Enfagrow A+ MindPro Step 3 provides 120mg of DHA with 3 servings/day. Reference: FAO 2010. Fats and fatty acids in human nutrition. Report of an expert consultation. FAO Food and Nutrition Paper no.91. FAO: Rome
Coupled with proper nutrition and parental stimulation. Nutrition supports growth and brain development, which is the foundation of mental (IQ) and emotional (EQ) development. Enfagrow A+ MindPro provides key nutrients: Protein, Calcium, Folic acid, Magnesium, Vitamin D, Vitamin A, Vitamin E, Zinc, Beta Glucan from Yeast, DHA and MFGM. MFGM Pro is a whey protein concentrate which contains Milk Fat Globule Membrane. MFGM is a natural source of phospholipids and sphingomyelin which are found abundantly in the brain. MFGM also contains source of proteins to support growth and development. Clinical research shows that regular consumption of formula enriched with MFGM for preschool children is associated with emotional and behavioral regulation in children (Veereman-Wauters et al. Nutrition; 2012 Jul; 28(7-8):749-752). Research also shows improved DHA status support learning and behavioural outcomes (Kuratsu OR, et al. Nutrients. 2013;5(7):2772-2810).
